

Job title: Dermatologist
Location: National Coordination Office (NCO), Abuja.
Responsible to: Thematic Lead, Head of Programs
Department: Programs Department
Job Type: Contract

Overview:

As a Dermatologist within our organization, you will play a crucial role in providing specialized medical care to individuals affected by Leprosy and NTDs. You will work closely with our multidisciplinary team to diagnose, treat, and manage dermatological conditions associated with these diseases. Your responsibilities will include but are not limited to:

Responsibilities:

Clinical Assessment and Diagnosis:

- Conduct thorough clinical assessments to diagnose dermatological conditions in persons affected by Leprosy and NTDs.
- Utilize diagnostic tools and techniques to accurately identify skin manifestations and associated complications.

Treatment Planning and Management:

- Develop comprehensive treatment plans tailored to the specific needs of each patient, considering the stage and severity of their condition.
- Prescribe medications, topical treatments, and other interventions to manage dermatological symptoms effectively.
- Monitor treatment progress and make adjustments as necessary to optimize outcomes.

Education and Counselling:

- Provide education and counselling to patients and their families regarding the nature of their condition, treatment options, and self-care practices.
- Address concerns and misconceptions related to Leprosy and NTDs, contributing to destigmatization efforts.

Collaboration and Referral:

- Collaborate with other healthcare professionals, including infectious disease specialists, nurses, and community health workers, to ensure coordinated and holistic care.
- Facilitate referrals to other specialists or healthcare facilities for advanced interventions or management of complications.

Research and Advocacy:

- Contribute to research initiatives aimed at improving understanding, diagnosis, and treatment of dermatological manifestations associated with Leprosy and NTDs.
- Advocate for policy changes and resource allocation to address the healthcare needs of affected populations at local, national, and international levels

Qualifications:

- Medical degree (MD or equivalent) with specialization in Dermatology.
- Board certification or eligibility in Dermatology.
- Valid medical license to practice in [Specify Location].
- Experience working in dermatology, preferably in the context of infectious diseases or tropical medicine.
- Strong clinical skills and ability to manage complex cases effectively.
- Excellent communication and interpersonal skills, with a compassionate approach to patient care.
- Commitment to promoting equity, inclusivity, and dignity for persons affected by Leprosy and NTDs.

Personality

- Committed Christian with good testimonies.
- Honest and dedicated
- Demonstrates the ability to use own initiatives.
- Ability to lead and manage team members as thematic Lead
- Problem solver.
